Analysis of Student Feedback on Program Evaluation and Academic Environment - 2020

Department of Mass Media, Sri Palee Campus

Introduction

The academic programme offered by the Sri Palee Campus for the Honors Degree in Mass Media is unique among similar programs offered by other universities, and it radically breaks away from conventional Media Degree Programmes. Its uniqueness is closely related to its being contemporary. The programme creatively responds and engages with contemporary socio- cultural contexts and technology developments in terms of new trends and discourses in the field of Mass Media. The main purpose of the subject content is to create a critical consideration and the modern technology in relation to the contexts of social, political, economic and cultural. This is the only degree program in Sri Lanka that provides maximum opportunities to put theoretical knowledge into practice when compared with other universities. This course produces journalists and intellectuals who are particularly suited to national and international needs.

The Internal Quality Assurance Cell (IQAC) of the Campus has continuously been working on the quality improvement and the betterment of student learning experiences. In order to analyze the gaps in the program and improve the program further, obtaining feedback from various stakeholders and analysis has become an integral part of the department. This report focusses on analysis of the feedback obtained from the final year students of the Department of Mass Media related to the Honors degree program they had been following and the learning environment in which they had been studying during the four-year of study period.

Feedback Analysis on the Study Program – Part I

The program evaluation questionnaire is a 25-item questionnaire developed by both CQA of the University of Colombo and the IQAC of the Sri Palee Campus to measure the study programs of Performing Arts and Mass Media of Sri Palee Campus. Each item was measured using a five-point Likert scale: 0 is strongly disagree, 1 is disagree, 2 is neither agree or disagree, 3 is agree and 4 is strongly agree. Respondents were presented with a statement and asked to select a response. Items 4, 10, 19 were negatively worded and these items were recoded prior to calculating the total and subscale scores. The analysis of the six subthemes, individual questionnaire items under each subtheme and the open-ended questionnaire items are presented below. Apart from five subscale scores, all 25 items were given an individual mean score out of a maximum of 4 to identify specific strengths and weaknesses; Items that have a mean score of 3 and over are considered to be real positive points. Items with a mean between 2 and 3 are considered as aspects/features to be enhanced further, and any item with a mean score of 2 or less, need to be examined more closely as they indicate problem areas.
