Introduction

Sri Palee Campus of the University of Colombo is located in a place that is considered as the hub of education in the recent past. It has been a center for many schools of arts, crafts, and sciences and a center for aesthetic studies for some centuries emulating the Shantiniketan. The honorable poet, novelist, and philanthropist, Gurudev Rabindranath Tagore visited Sri Lanka in 1934 and laid the foundation stone for Sri Palee on the 20th May in 1934. This unique place is full of cultural diversity and geographically, it is an area where people belonging to different cultures, traditions, and ethnicities live in peace.

Similarly, Sri Palee Campus is ideally located in a mountainous area, an isolated place with no disturbance from neighborhood and with scenic beauty and mild weather environment. It consists of 32 acres of land in extent and can be extended further with the acquisition of lands located nearby. There is easy access from the campus to the metropolitan city, Colombo due to the highway which runs around 10 kilo meters away from the campus.

Sri Palee Campus of the University of Colombo formerly named as the Western Campus was first established by the Sri Lankan Government on the 20th of June 1996 and its name was subsequently amended to Sri Palee Campus on the 11th of September 1998. The Campus is located at Wewala, Horana in Kalutara District on the land and buildings, donated to the University of Sri Lanka in 1978 by the Board of Trustees set up under the will of late Mr. Wilmot A. Perera, an eminent public personality and well-known philanthropist. To meet the wishes of Mr. Perera to create a center of excellence in cultural and aesthetic studies, Sri-Palee Campus has commenced its activities with the establishment of two faculties namely Faculty of Media Studies and Faculty of Performing Arts in 1999. However, they have been functioning as two major departments in the campus since its establishment.

Current Status of the Campus

Sri Palee Campus of the University of Colombo has become a pioneer in offering unique programs in the field of media studies and performing arts. The Department of Media Studies currently offers a four-year special degree program for all media students who are able to specialize in four different fields namely media studies, print media, television, and radio. Currently, the Print Media Unit and the Audio-Visual Unit affiliated to the Department of Media Studies are functioning to offer the practical knowledge required for media students. In addition, the Campus Radio has been established as a pioneering new program of activity based on a radio channel. This reaches out various communities of interest and allows undergraduates to enhance their practical skills in broadcasting.

The Department of Performing Arts currently offers a four-year special degree program for all performing arts students who can specialize in five different fields namely, dance, music, drama and theater, film studies, and art and design.

The Departments of Languages and Computer Studies have been functioning as departments since May 2015. The Department of Languages offers English language proficiency courses as compulsory service courses for the first and second year students and as optional courses for the third and fourth year students. In addition, it offers Hindi and Tamil languages to all undergraduates as optional courses. Similar to the Department of Languages, the Department of Computer Studies also offers computer courses for all undergraduates of the campus. These two departments are yet to develop their undergraduate study programs in the near future.

Existing population

Currently the annual graduate intake has increased up to 160 and the total student population is approximately 600 - 650. The total community population exceeds 700 including 27 academic members, six academic supporting members, three administrative officers, and 70 non-academic staff members.

VISION OF THE CAMPUS

A center of excellence of global presence in producing transformative knowledge through education, research, creativity, and entrepreneurship

MISSION OF THE CAMPUS

1. Create a transformative educational process and learning experience for students
2. Cultivate a vibrant, engaged, and healthy campus community, based on the concept of integrated living, committed to social responsibility, critical thinking, creativity, collaborative spirit, and professionalism

We behave ethically and with sensitivity toward social, cultural, and environmental issues. We create an inclusive and supportive campus community in which we celebrate and reward our achievements. Our community has the opportunity to enrich their lives and pursue their goals.

Our Goals

1. Achieve excellence in teaching and learning to produce competent, skilled, ethical, creative, and socially responsible graduates
2. Achieve excellence in research and innovation
3. Create a university community committed to be independent thinking who contribute to public policy formulation and national development
4. Improve institutional culture and climate and enhance wellness and support for the campus community
5. Develop required infrastructure to achieve the other goals

Gap Analysis

Sri-Palee Campus is a unique campus producing competent graduates in Performing Arts and Media Studies, where few other universities in the world are producing graduates of similar disciplines. However, the facilities available in the campus for study areas need improvement to produce better qualified graduates. The gaps identified in the campus structure has been hindering further development of the campus for nearly 18 years and if it is to make a high quality campus functioning under the University of Colombo, the gaps identified as follows are to be filled immediately.

Inadequate Infrastructure Facilities

Extreme lack of infrastructure has affected negatively the quality and attractiveness of the overall work environment which helps recruit and retain outstanding faculty, students, and staff. It will be impossible to build strong programs within the current built environment and ad-hoc developments all around. The infrastructure built for very conventional small classrooms at the initial stage of this higher education institution commenced in 1930's was very outdated and is in a dilapidated condition and hence is not currently conducive for teaching and learning activities. Therefore, decisive steps should be taken to remedy these conditions and create nurturing academic and aesthetic environment on and around the campus by creating state-of-the-art infrastructure. Then only will it support, enable, and enhance the academic work of the campus and motivate its faculty, staff, and students. In other words, state-of-the-art infrastructure facilities will fully support its mission of teaching, learning, research, and community service engagement as a higher education institution.

The current campus buildings have a capacity to house about 700 in classroom space with the least learning and teaching facilities. In our five-year strategic plan 2019-2023, we project that enrollment on our campus will grow to about 1000 students by 2022 totaling more than 1100 campus community if the required infrastructure is developed. Accordingly, new student housing, new classrooms and office space for both students and staff are required to accommodate the growth that the Campus will experience in the coming 5 years.

Inadequate Educational Facilities

The substandard facilities for curricular and extracurricular activities is another pressing need for the quality of the academic programs offered. To enable our students in all fields to work at the forefront of their disciplines, it is vital to give them access to the most advanced modern technological tools and equipment. These high quality equipment and services should be provided to students and faculty members alike through establishing different digital studios, theaters, computer technology, and so forth to promote teaching, learning and assessment in students' specific disciplines. Provision of high quality equipment and services will send a strong message to prospective students and faculty that the Campus is dedicated to excellence in the fields of media studies, performing arts, languages and computer studies. This is vital for maintaining a competitive edge in our effort to bring talented women and men into our community.

Inadequate Service Facilities – The basic services for the students in terms of sports, recreational facilities, common rooms, canteens, and sanitary facilities are inadequate in the entire campus. Shortage of living quarters for academic staff has also been identified as a problem in the Campus. To provide an environment conducive for better teaching and learning, such facilities need to be strengthened as early as possible.

Lack of Human Resources – Lack of adequate academic, administrative, and non-academic staff also negatively affects the smooth functioning of all activities of the campus. In addition to the vacancies, there exists a situation of inadequate cadre in relation to the nature of activities that the Campus is undertaking. As the Campus has initiated the blended learning mode in teaching, learning, and assessment activities, technical staff with necessary skills and experience is essential for both students and teaching staff with regard to regular technical and service support. Moreover, the Campus requires more lecturers and tutors/demonstrators to supervise and guide students on practical sessions and support staff for the units and centers already established and yet to be established, in order for them to function smoothly.

Lack of a Better Mechanism for Staff Training – Three fourth of our faculty members are to undergo postgraduate studies training overseas. Lack of required competency in the English language has been identified as a barrier for applying for placement at reputed international universities. There should be a mechanism to improve the English competency skills and send them for training immediately if the teaching and researching skills among the faculty is to be improved.

Non-availability of a Management Information System (MIS) – The Campus also lacks a Management Information System which facilitates sharing of information such as those on available infrastructure facilities, student population, time tables, allocation of campus resources and so forth. A comprehensive MIS system will increase the work efficiency and also facilitate the optimum capacity utilization of available resources.

Financial Restraints – As the budget allocation to the Campus is highly constrained due to the fact that the treasury funds of the Colombo University are distributed equally among all faculties and the campus, separate budgetary allocation for the campus is critical for capital /development budgets in addition to the recurrent budget.
